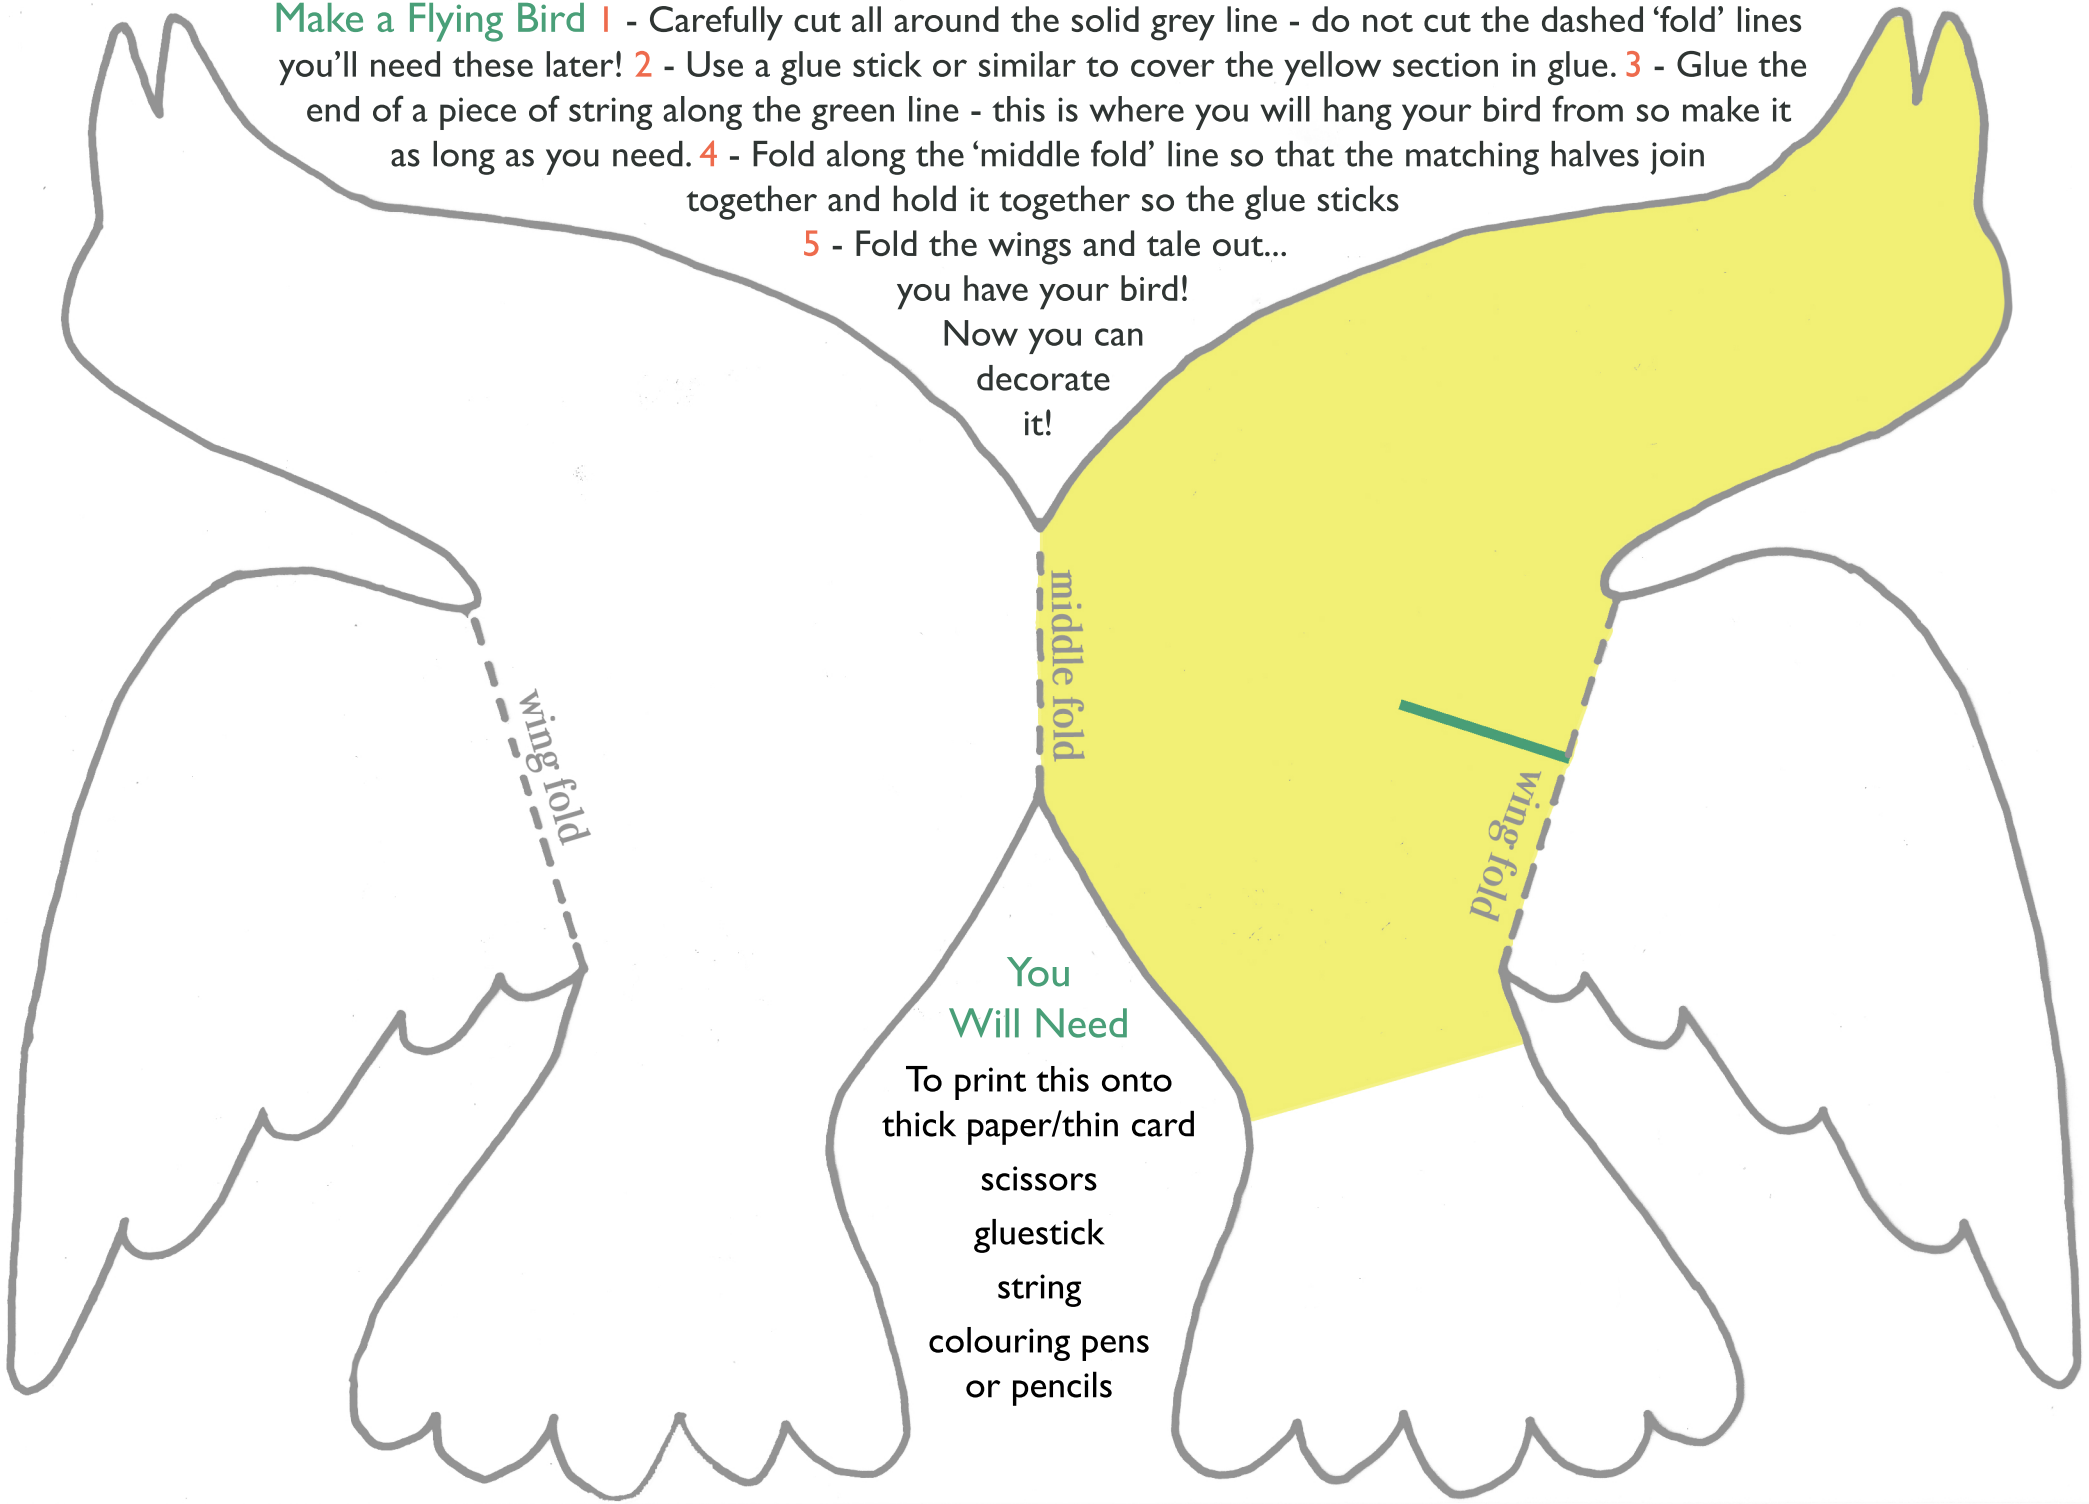
Make a Flying Bird 1 - Carefully cut all around the solid grey line - do not cut the dashed 'fold' lines you'll need these later! 2 - Use a glue stick or similar to cover the yellow section in glue. 3 - Glue the end of a piece of string along the green line - this is where you will hang your bird from so make it as long as you need. 4 - Fold along the 'middle fold' line so that the matching halves join together and hold it together so the glue sticks

5 - Fold the wings and tale out...

you have your bird!

Now you can decorate it!



You Will Need

To print this onto thick paper/thin card

scissors

gluestick

string

colouring pens or pencils
